## Half-way to Christmas Goal

Imagine if Santa could only make it half way down the chimney or you could only serve half a Christmas dinner to your guests. It would be like Norfolk General Hospital providing only half the care you've become accustomed to. Last month the NGH Foundation sent out a letter from Dr. Nancy Gabel, Medical Chief of Staff detailing this year's Christmas appeal. Dr. Gabel listed the over \$65,000 worth of new vital medical equipment needed to treat patients at our hospital. The list includes 2 Electrocardiogram (ECG) machines, a portable Bronchoscope, a Glidescope, 4 crash carts and a syringe infusion pump.

I am happy to report that an always generous community has made donations bringing us to a little more than half way to our goal. To those that have given thank you. To those whose letter is still unopened please take the time to make your gift today. And, if you didn't receive an invitation to support your hospital and wish to make a donation, contact the Foundation right away.

Some things should never happen half way. The tools that can save lives are some of those things. You can help. Give today.

Merry Christmas,

Jennifer White  
Director Norfolk General Hospital Foundation
